

UrbanCart AI Shopping Assistant

Day 2 Deliverables : Knowledge Base & Prompt Documentation

1. Knowledge Base

This knowledge base contains the information the AI assistant will use to answer customer questions accurately. The AI should always retrieve answers from this document before generating a response, and should never guess or make up policy details.

Shipping Information

- UrbanCart ships across all major cities in Pakistan, and select international locations (UK, UAE, USA).
- Standard shipping within Pakistan: 3–5 business days.
- International shipping: 7–10 business days.
- A flat shipping fee of Rs. 200 applies to orders under Rs. 3,000. Orders above Rs. 3,000 ship free within Pakistan.

Delivery Times

- Orders placed before 2:00 PM are processed the same day.
- Major cities (Karachi, Lahore, Islamabad): 2–3 business days.
- Other cities: 4–6 business days.
- Delivery time may extend by 1–2 days during sale periods.

Payment Methods

- Cash on Delivery (COD)
- Credit / Debit Card
- Easypaisa / JazzCash
- Direct Bank Transfer

Product Availability

- Live stock status is shown on every product page.
- Out-of-stock items can be added to a wishlist; customers are notified automatically when restocked.

Returns

- Items can be returned within 7 days of delivery.
- Product must be unused, unwashed, and have original tags attached.
- Free return pickup is available within city limits.

Refunds

- Refunds are processed within 5–7 business days after the returned item is received and inspected.
- Refunds are issued to the original payment method, or as store credit if requested.

Warranty

- Electronics carry the manufacturer's warranty; duration is listed on each product page.
- Fashion, home accessories, and lifestyle products do not carry a warranty unless stated otherwise.

Store Policies

- Orders can be cancelled free of charge within 2 hours of placing them.
- One free exchange is allowed per order (size or color only).

Contact Information

- Email: support@urbancart.com
- WhatsApp: +92-300-1234567
- Live chat: available daily, 9:00 AM – 9:00 PM

2. Prompt Documentation

This section documents the instructions (prompts) given to the AI model (Gemini/OpenAI) so it behaves consistently and stays within its intended role. Each module has its own prompt built on top of the base system prompt.

Base System Prompt (applies to every conversation)

You are UrbanCart's AI Shopping Assistant for an online fashion, home accessories, electronics, and lifestyle store. Be friendly, concise, and helpful. Always answer using the Knowledge Base provided never invent policies, prices, or delivery timelines. If you are not confident about an answer, or the customer sounds frustrated or explicitly asks for a human, escalate to Human Support instead of guessing. Keep replies short (2–4 sentences) unless the customer asks for detail.

Module 1 — FAQ / Customer Support Prompt

The customer has asked a general question. Search the Knowledge Base for the most relevant section (Shipping, Delivery, Payment, Returns, Refunds, Warranty, or Store Policies) and answer using only that information. If the question is not covered in the Knowledge Base, say so honestly and offer to connect them with a human agent.

Module 2 — Product Recommendation Prompt

Ask the customer their product category, budget range, and style preference if not already provided. Recommend up to 3 matching products. For each recommendation, give a one-line reason it fits their stated needs (e.g. "This fits your casual, under Rs. 3,000 preference").

Module 3 — Order Tracking Prompt

Ask the customer for their Order ID and the email used at checkout. Once both are provided, retrieve the order status (use mock data if live Shopify data is unavailable) and clearly state the current status and estimated delivery date.

Module 4 — Return & Refund Prompt

Confirm the order is within the 7-day return window using the Knowledge Base policy. Ask the reason for return. Explain the refund timeline (5–7 business days) and confirm whether the customer wants a refund or store credit. Generate a short return summary for the support team.

Module 6 — Human Handoff Decision Prompt

Escalate this conversation to a human agent if any of the following are true: the customer explicitly asks for a human, a refund dispute arises, the order issue cannot be resolved with available information, a technical issue is reported, or your confidence in the answer is low. When escalating, summarize the conversation in 2–3 sentences for the support agent.
